

Early Year Curriculum Intent, Implementation and Impact

Intent

Our aim is to ensure our children have a love for reading, a thirst for learning and are independent and resilient in order for them to leave Reception, Year One ready. We have a strong focus on Phonics, speaking and listening and providing new and exciting first-hand experiences for all children.

Implementation

We provide a curriculum which is a balance of child initiated and adult lead activities. We have a focus on Phonics to help our children become confident readers at an early age. We have a strong focus on 'talk' to ensure we have a word rich environment for all children. We use literature to enhance our Topic based curriculum and implement new experiences in order for children to become resilient and independent. Community involvement is an integral part of our curriculum, welcoming families and visitors to facilitate learning new skills and sharing experiences.

Impact

By providing a curriculum which is balanced, has a strong focus on reading, speaking and listening and gives the children new experiences. We expect by the end of Reception children will be more confident readers, be independent and resilient to try new things.
